Index

Abate, determination of thiodiphenol in humans 311
Acaricides, microbial degradation of Galecron 158
-, residues of chloropropylate in rat tissues 509
Acetylcholinesterase, temperature affects on activity in fish 347
Algae, depression of primary production by organophosphates 553
Animals, effect of insecticides on earthworms 577
Apparatus, electron capture detector bypass 452
Arochlor, in sediment, water and biota 164
Azinophos, determination by G.L.C. 42
Azobenzene, residues from aniline herbicides 34

Benlate, decomposition of 67
BHC, residues in eggplant 342
Birds, biopsy technique 443
-, DDT residues in ducks 13
-, DDT residues in pelicans and ducks 231
-, dieldrin poisoning in chickens 493
-, effect of DDT on microsomal enzymes of chickens 569
-, effect of DDT on quail 152
-, insecticide residues in Idaho starlings 243
-, pesticide levels in 474

Carbaryl, metabolism in cell culture 287
Cattle, DDT in 389
Chlordane, residue in milk 292
-, characterization of oxychlordane 521
Chlordene, chromous chloride reduction of 429
Chlorobromuron, disappearance in ensilage 50
Chromous chloride reduction, confirmation of heptachlor 251
-, degradation of DDT 133
-, products from chlordene 429
-, products from heptachlor 429
-, products obtained from endrin 435
Clean-up, a rapid column clean-up of fat 70
Coliforms, populations in river complexes 447

DDT, assimilation by oysters 455
-, and DDE determinants in serum 16
-, degradation with chromous chloride 133
-, determination in the presence of toxaphene 260
-, disappearance of residue from lettuce 30
-, effect of putrefaction on analysis in eggs 222
-, effects of salinity on uptake by fish 404
-, effect on japanese quail 152
-, effect on microsomal enzymes in chicken 569
-, eggshell thining as influenced by exposure to 191
-, estrogenic activity in rats fed 61
-, DDT in cattle 389

DDT, residues in eggplant 342
-, residues in eggs of pelicans and in ducks 231
-, residues in forest soils 139
-, residues in ducks 13
-, sensitivity of fish to 362
-, sources of interferences in analysis of 379
-, uptake by alfalfa from soil 85
-, uptake by phytoplankton 218
Dieldrin, effect of metnionine on the metabolism of 468
-, effect on Triboleum castaneum 397
-, identification of residues 515
-, poisoning in chickens 493
-, residues from use in tsetse control in Africa 164
-, sources of interferences in the analysis of 379
-, uptake by rye 463
Dinobuton and dinoseb, photodegradation of on bean leaves 72
Disulfoton, degradation in soil 1

Eggs, pesticide levels in 474
Endrin, chromous chloride reduction of 435
-, measurement following poisonings 24
Enzymes, heptachlor and changes in liver 529
Esterases, agar gel electrophoresis of inhibited 237
-, effect of organophosphates on 213
-, starch gel electrophoresis of inhibited 181

Fenitrothion, metabolism affected by heptachlor 195
Fish, avoidance reactions in 205
-, determination of residual fuel oil in 560
-, DDT residues in shrimp 333
-, effect of sumithion on 440
-, effect of salinity on DDT uptake by 404
-, insecticide residue storage in trout 300
-, sensitivity to pesticides 362
-, temperature effects on acetylcholinesterase of 347
-, toxicity of organic reactor coolants to 145
-, toxicity of PCB's to 202
Formentanate, decomposition in soil 324
Fungicides, decomposition of 67
-, determination by phosphorimetry 565

Galecron, microbial degradation of 158
GLC and TLC in determination of organochlorine residues 263
-, liquid phases for parathion 98
-, monitoring production of parathion,s-isomer, by 207
-, of azinophos derivatives 42
-, of GC-6506 insecticide 10
-, of paradichlorobenzene metabolites 354
-, of parathion and metabolites 111
-, sources of interferences in analysis of insecticides by 379
-, of triazine herbicide 6

HCN, determination of residues in tomatoes 95
Heptachlor, chromous chloride reduction of 429
-, confirmation by chromous chloride reduction 251

Heptachlor, effect on fenitrothion metabolism 195
-, major fecal metabolite of heptachlor epoxide 489
Herbicide, effect of 2,4-D on magnesium-calcium ratios 54
Herbicides, microbial cometabolism of 2,4,5-T 537
-, phosphorous detection of 6
-, residues of azobenzene from aniline 34

Insecticides, characterization of oxychlordane 521
-, chlordane residues in milk 292
-, confirmation of heptachlor by chromous chloride reduction 251
-, DDT residues in forest soils 139
-, DDT residues in pelicans and ducks 231
-, DDT residues in shrimp 333
-, depression of primary production in algal 553
-, detection in whole wheat flour 276
-, detn of DDT in presence of toxaphene 260
-, detn of GC 6506 in cottonseed 10
-, detn of thiodiphenol in humans 311
-, dieldrin poisoning in chickens 493
-, dieldrin residues in Africa from TSETSE control 164
-, effect of advenalectomy on storage 373
-, effect of DDT on eggshell thinning 191
-, effect of DDT on quail 152
-, effect of DDT on microsomal enzymes in chicken 569
-, effect of egg putre faction on DDT analysis 222
-, effect of Heptachlor on fenitrothion metabolism 195
-, effect of organochlorine on cholesterol levels 368
-, effect on earthworms in pasture 577
-, effect on insect and grain esterases 213
-, electrophoresis of esterases inhibited by 237
-, elimination rates of chlorobenzilate in tissues 509
-, identification by mass spectrometry 587
-, identification of dieldrin residues 515
-, liquid phases for GLC of parathion 98
-, metabolism of carbaryl in cell culture 287
-, monitoring production of parathion S-isomer 207
-, oxidation of parathion by ozone 87
-, persistence of Methidathion in soils 104
-, residues of DDT and BHC in eggplant 342
-, residues in Idaho starlings 243

Kelthane, residues in irradiated Almond hull meal 247

Lead, binding in tissues 115
-, in carbonated fruit juices 271

Malathion, agar gel electrophoresis of esterases inhibited by 237
Mass spectrometry,identification of chlorinated pesticides by 587
Mercury, comparative levels in maternal and other blood 502
-, determination of 502
Metabolism, carbaryl in tissue culture 287
-, dieldrin and effect of methionine on 468
-, major fecal metabolite of heptachlor epoxide 489
-, of 2-nitro-1,1-bis-p-chlorophenylpropane 255

Methidathion, persistence in soils 104

Organochlorine Insecticides, effect of moisture on soil penetration 422
Oyster, assimilation of DDT by 455

Paradichlorobenzene, GLC of metabolites 354
Parathion, comparison of liquid phases for 98
-, GLC of and metabolites 111
-, modification of microsomal activity by 125
-, monitoring S-isomer production 207
-, oxidation to paroxon by ozone 87
-, separation of desmethyl parathion by TLC 47
PCB's, Arochlor in water sediment and biota 171
-, in human adipose tissue 317
-, toxicity to aquatic animals 279
-, toxicity to Gammarus oceanicus 202
Pesticides, effect on growth and survival of Euglena 226
Plants, uptake of dieldrin by rye 463
Photolysis, of dinobuton and dinoseb 72
-, piperonyl butoxide 546
Phorate, degradation in soil 1
Piperonyl butoxide, photolysis of 546
Pyrazon, dephenylation of, in soil 79

Rats, detn of thiodiphenol in rat urine 311
-, effect of DDT on estrogenicity 61
-, effect of methionine on dieldrin metabolism in 468
-, elimination rates of chlorobenzilate and chloropropylate in 509
-, major fecal metabolite of heptachlor epoxide in 489
-, microsomal activity and parathion in 125

Salinity, effect of, on DDT uptake by fish 404
-, levels in river complex 414
Soils, DDT residues in forest 139
-, decomposition of Formentanate in 324
-, degradation of disulfoton and phorate in 1
-, dephenylation of Pyrazon in 79
-, effect of moisture on insecticide penetration in 422
-, persistence of Methidathion in 104
-, TLC and GLC determination of residues in 263
-, uptake of DDT by alfalfa from 85
Sumithion, effect on fish 440

TLC, detn of organochlorine insecticide residues 263
-, of vernolate and metabolites 38
-, separation of desmethyl parathion 47
Toxaphene, detn of DDT in presence of 260

Vernolate, TLC separation of metabolites of 38

Water, analysis for pesticides using silica-gel cleanup 542
